

Hitachi Hoists

Electric Chain Hoist

HITACHI Electric Chain Hoist

Widely used to make cargo handling more efficient.

A wide range of applications are provided for not only general machinery, automobile, can manufacturing and other plants but also for applications from primary to tertiary industries including warehouses and retail stores.

The electric chain hoist is only meant for transporting cargo. It is not to be used for hoisting and transporting people.

Features

Standard Model	7-8
CE Marking Model	9-10

S series

■ Suspension type	11-12
● With motorized trolley - ET	13
● With motorized trolley - ST	14
● With chain driven trolley - BC	15
● With manual driven trolley - BP	16

F series

● Suspension type	17-18
● With motorized trolley - ET	19
● With motorized trolley - ST	20
● With chain driven trolley - BC	21
● With manual driven trolley - BP	22

Others

● Crane wiring unit	23
● Dedicated electric chain hoist	24-26
● Technical materials	26

Outline

S series

F series

Others

You can make an exacting model selection based on such operating conditions as capacity and speed.

S series Suitable for general work. Economical standard speed model.

	Rated load	250kg	500kg	1t	2t	3t	5t	10t	15t	20t
(P11—P16)										
Single speed model : S										
Dual speed model : SN										
Single phase model : SS, S1										

F series High-speed model that is sturdy and suitable for high-speed work.

	Rated load	250kg	500kg	1t	2t	3t	5t	10t	15t	20t
(P17—P22)										
Single speed model : F										
Dual speed model : FN										

Trolley series

	Rated load	250kg	500kg	1t	2t	3t	5t	10t	15t	20t
Motorized trolley-ET series Single speed model : ET								5ET×2	7.5ET×2	10ET×2
Motorized trolley-ST series Single speed model : ST										
Chain driven trolley : BC										
Manual driven trolley : BP										

Dedicated electric chain hoist contents

- Twin hook type electric chain hoist — 24
- Low head room type — 25
- Optional power source electric chain hoist and trolley — 25
- Optional control voltage model — 25
- Electric chain hoist with the Hi-plated chain — 25
- Electric chain hoist with overload prevention unit (with OL) — 25
- With geared limit switch (UDS) — 25
- Other products with changed specifications
Lift change (extension), etc. — 25—26

Standard Specifications

Specifications		Standard model	CE Making model
Power Source*		3 phase : 220/380—415V 50Hz 1 phase : 220—240V 50Hz	
Operation Method		Operating pushbutton	
Control Voltage		24V	
Power Method		Suspension type with manual driven trolley or chain driven trolley : with 5m cable With motorized trolley : cable and catch are not included with standard shipment

	4(5)	single speed dual speed	↑ ↓ ← → ↑ ↓ ← →
	6(7)	single speed dual speed	↑ ↓ ← → ↺ ↻ ↑ ↓ ← → ↺ ↻
			STOP
Color(Munsell)		Orange(2.5YR 6/12)	
Electrical Protection		IP54(S-series(1t and above),Trolley : IP44) (Equivalent when stuffing drain hole)	
Insulation Class of Motor		E	
Rating**		30%ED, 180starts/h(1 to 5S : 25%ED, 150starts/h)	
Standards		Machinery : 98/37/EC EMC : 89/336/EEC, 92/31/EEC, 93/68/EEC	

* For power sources other than those listed, see the dedicated electric chain hoists (page25).
** This shows the value at a load of 63% of the rated load.
** Make sure the average value per hour is not exceeded even during concentrated use in a short time.
** Dual speed models have an added low speed to allow fine movement operation and improve workability by reducing inching. The rating shows the value when the high speed and the low speed, the operation time of which is 1/10 of the high speed, are combined.

Series Selection

When selecting an electric chain hoist, the operating environment, operating time, and operating frequency must be taken into consideration.

Operating time and load ratio

Use within the range of section.

Load Condition	Load Ratio	Mean operating hour per day (h)					
		0.25	0.5	1	2	4	8
Light	$K \leq 0.5$						
Medium	$0.5 < K \leq 0.63$						
Heavy	$0.63 < K \leq 0.8$				S, F series		
Severe	$0.8 < K$						

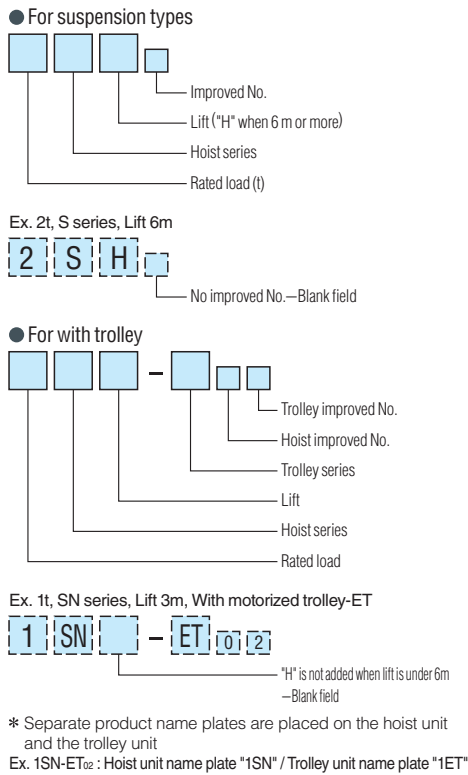

Load condition
Light : This is normally used at a load of 1/2 the rated load, and on rare occasions at the rated load.
Medium : This is normally used at a load of 1/2 to 2/3 the rated load, and occasionally at the rated load.
Heavy : This is normally used at loads above 2/3 the rated load, and often at the rated load.
Severe : This is mostly used at the rated load or close to this load.

* If use is expected to exceed the above range, then an electric chain hoist with a higher capacity must be selected, so please consult with HITACHI.

Operating environment

- Use in locations with an ambient temperature of -10°C to 40°C (with no freezing) and humidity of 90% or less (no condensation).

Model Explanation

In addition to the general specifications, (1) starting frequency, (2) duty factor, and (3) load ratio must be taken into consideration.

- Calculation method
(If the calculated value exceeds the standard specification, then it is a dedicated specification.)

(1) Max. starting frequency α (Starts/h)= $2 \times n \times N$
● Example calculation
The starting frequency is the cumulative sum of the inching operation count, so this must be calculated by estimating the number of inchings per hoist round trip.

$2 \times 3 \times 25 = 150 \text{ Starts/h}$

(2) Duty factor $\beta(\%) = \frac{\text{The total motor ON time (minutes) per hour under the most frequent condition.}}{60 \text{ min}} \times 100$
● Example calculation

$2 \times \frac{3}{10} \times 25 \div 60 \times 100 = 25\%$

(3) Load ratio $K = \sqrt[3]{P_1^3 t_1 + P_2^3 t_2 + P_3^3 t_3 + \dots}$
● Example calculation
When a 0.4t load is suspended on a 1-ton rated load electric chain hoist for a one-way trip, with a no-load return trip. (The lifting sling is 0.3t).

$K = \sqrt[3]{(0.3+0.4)^3 \times 0.5 + 0.3^3 \times 0.5} = 0.57$

In this case, the load condition is comparable to "medium" and the average operating time per day is 2 hours or less. If used for a longer time than this, an electric chain hoist with a higher capacity must be selected.

n : Inching count (times) per lifting or lowering operation.
N : Transport count (times) within 1 hour
ℓ : Lift(m)
V : Hoisting speed(m/min)

t₁, t₂, t₃ : Ratio of the operating time of each load to the total operating time
P₁, P₂, P₃ : Each load ratio (ratio of the load to each rated load)

● Operating Conditions and Model Selection Method

Select a model from the following that is suitable for the operating conditions.

Operating Conditions		Main Unit	Trolley	Pushbutton Cable	Crane Saddle	Option
Suspension Type		S series F series P11 P17	—	Power cable Pushbutton cable 		
Manual Driven Trolley Type			BP series P16 P22	2PB(H) For single speed 2PBN(H) For double speed		
Chain Driven Trolley Type			BC series P15 P21			
Motorized Trolley Type			ET series ST series			
Motorized Trolley Motorized Travel Type			P13, 14 P19, 20			
Manual Driven Trolley Motorized Travel Type			BP series P16 P22	Wiring unit 4PB(H)-C 4PBN(H)-C	Crane saddle TL series TLM series TH series THM series SL series SLM series	Crane girder switch unit (24V operation) GMB-10
Chain Driven Trolley Motorized Travel Type			BC series P15 P21			

Pushbutton cable

* The operation method is a pushbutton operation. Indirect 24V control voltage.

* A power cable is not included with the trolley. Refer to the Power cable in the list below and prepare a suitable one.

Hitachi Electric Chain Hoists are Packed with Advanced Features

STANDARD MODEL S series **S** / F series **F**

HELICAL GEARING **S F**

used where practical to provide quiet operation.

LONG LIFE BRAKE UNIT **S F**

Disk type Electro-Magnetic brake system for steady operation and long life.

● AUTOMATIC ADJUSTING BRAKE **F**

are equipped with patented Automatic Adjusting Brake for easier maintenance and added safety.
U.S. PAT. 3908802
Germany PAT. 2354044

ELECTRO-MAGNETIC CONTACTOR **S F**

with mechanical-interlocking against line short by mechanical shock.

● REVERSE PHASE INSPECTING RELAY **S F**

cut control circuit when reverse phasing.
Except the 3 phase models of 250 kg and 500 kg, and single phase models.

POWER CHAIN **S F**

special (patented) alloy steel chain surface hardened for optimum strength and wear resistance.
(U.S. PAT. 3830054)

CHAIN CONTAINER **S F**

as standard part for safer operation.

LOWER HOOK **S F**

is heat-treated and equipped with safety latch and 360° swivelling.

LIMIT SWITCH (Upper and Lower) **S F**

interrupt motor power to prevent hook overtravel and hazardous condition such as chain kink.

● AUXILIARY BRAKE SYSTEM **F**

F series hoists equipped with auxiliary brake.

PLUG-IN CABLES **S F**

reduce maintenance time and installation.

PUSHBUTTON CABLE **S F**

is molded with strain relief wire rope into one body. This assures easier and safer operation.

PUSHBUTTON SWITCH **S F**

is rain-proof plastic for severe impact and corrosive atmosphere resistance and mechanically interlocked. The 24 volt control circuit reduce shock hazard to the operation.

● HITACHI OVERLOAD LIMITER **S option F option**

Unique, patented over load protection device is available on all models upon request.
U.S. PAT. 4103873
CANADA PAT. 1062232
Others

Conform with Essential Requirements Set Out in European Directives

CE MARKING MODEL S series **S** / F series **F**

For a crane that uses a chain or manual driven trolley for transverse movement and an electric motor for travel, please purchase a 4PB(H)-C, 4PBN(H)-C type wiring unit (See page 23).

Outline

S series

F series

Others

Crane wiring unit

4-point pushbutton crane wiring unit

- This is a wiring unit for connecting to the crane electro-magnetic switch and the hoist main unit.
- Connection can be done simply by just attaching to the hoist main unit.
- A unique HITACHI operation cable with a single protective wire provides excellent operability and durability.
- The pushbutton is made of drip-proof hardened plastic.
- The pushbutton cable employs a one-touch outlet to allow it to be connected easily.

Specifications table

The product is a wiring unit that combines an electric chain hoist with an crane saddle for use with manual traverse (manual or chain driven trolley) and motorized travel 4-point pushbutton cranes.

For single speed models

Model Name	4PB-C	4PBH-C
Lift	3m	6m
Approx. Weight	3kg	3.5kg

For double speed models

Model Name	4PBN-C	4PBNH-C
Lift	3m	6m
Approx. Weight	3.5kg	4kg

Electro-magnetic switch unit with crane case

- This is the electro-magnetic switch unit with a case for girder operation (24V) for when a HITACHI electric chain hoist (with motorized trolley) is used in a crane girder system. (Applicable up to HITACHI crane saddle TLU5-56 and TH5-56)
- Install in a freely selected location of the girder system, and the transition cables for girder and trolley, and the power cable are connected to the terminal block.

Specifications table

Model Name	GMB-10	
Electro-magnetic Contactor	Type	HMU-12
	Control Voltage	24V
	Current Capacity	10A
Approx. Weight		4kg

Dedicated electric chain hoist

Others

Twin hook type electric chain hoist

The HITACHI twin hook type electric chain hoist is a two-chain, two-hook type with two chain hoists in the same sprocket axis. Since there is 1 chain hoist drive, the load is kept level during hoisting. This is optimal for long items that must be hoisted from 2 points and cargo that must be kept level.

Others

Dedicated electric chain hoist

Low head room type

The HITACHI low head room type has a smaller Z dimension (minimum distance between the rail bottom surface and the lower hook) making it effective for work that hoists the cargo as high as possible in structures with a low ceiling.

Hoist type	1/2SL	1SL	1FL	2FL	2.8FL	1/2SNL	1SNL	2FNL	2.8FNL
Trolley type	1ET			2ET	3ET	1ET		2ET	3ET

Control Voltage(V)	24					24			
Link Chain	Diameter	φ7.1	φ7.1	φ7.1	φ10	φ10	φ7.1	φ7.1	φ10
	No. of falls	1	1	1	1	2	1	1	2
Dimensions (mm)	Z	440	440	440	552	680	440	440	552
	A	846	846	846	1,080	1,160	846	846	1,080

* Traverse only supports linear travel.

Optimal power source electric chain hoist and trolley

When the power source specifications differ, the following power source products will be manufactured.

50Hz	240V, 346V, 440V, 500V
60Hz	230V, 380V, 440V, 460V, 550V

Optional control voltage model

The HITACHI electric chain hoist control voltage is 24V, but products with a specified operating voltage can be manufactured when they must match the voltage of other devices.

Control voltage	100V 50/60Hz, 200V 50/60Hz
-----------------	----------------------------

Eclectic chain hoist with the Hi-plated chain

This comes with a corrosion-resistant Hi-plated chain. The chain specifications and strength are those of a power chain.

Hi-plated chain	Electroless nickel plating (Chemical resistance strengthening treatment, Plating thickness 8 μm)
-----------------	---

Eclectic chain hoist with overload prevention unit (with OL)

The HITACHI electric chain hoist that employs an "overload protection unit" was produced in response for demand for increased safety.

* Lowering operation is possible after the overload prevention device operates.
First push the lowering button once before beginning the operation.

Features

- Allows cargo handling work while preventing overloading.
- The operation load remains stable even after repeated operation.
- This device was designed to avoid excessive shocks to ensure a long useful life.
- It is an electromechanical type, so it can support optional power source specifications.

Operation principles

Operation of the detection unit built into the reduction gear shuts off the hoist operation circuit. This is HITACHI's unique "overload prevention unit". It detects overload operation and then stops operation while keeping the load hoisted.

Operation load : 110 to 140%

With geared limit switch (UDS)

- This type has a built-in switch (UDS switch) that allows the upper and lower limit stop positions to be freely set and that outputs signals of a mid points and other locations by detecting the motor speed.
- From 2 to 8 contacts is possible.
2 of the contacts are used for the upper and lower limit switches. Unless otherwise specified, both the upper and lower limits are set at the time of shipment to be activated approximately 100 mm in front of the limit switch built into the main unit.

Traverse double speed motorized trolley series

This is suitable for applications requiring a stop system and efficient operation.

Specifications table

Trolley type	1ETN	2ETN	3ETN	5ETN
Rated load	1t	2t	3t	5t
Rating	20%ED, 120Starts/h			
Applicable Beam Width (mm)	75—125	100—150		125—175

For a speed ratio of 4:1

Trolley type		1ETN	2ETN	3ETN	5ETN
Traveling Speed (m/min)		21/5.3			
Motor Output (kW)		0.27/0.07		0.6/0.15	
No. of poles		2/8			

For a speed ratio of 2:1

Trolley type		1ETN	2ETN	3ETN	5ETN
Traveling Speed (m/min)		21/10.5			
Motor Output (kW)		0.27/0.14		0.6/0.3	
No. of poles		2/4			

*When specifying a transverse double speed motorized trolley, the pushbutton switch configuration differs depending on whether the hoist unit and travel crane saddle are single speed or double speed, so contact HITACHI.

*The total value for low speed and high speed is shown for the rating.

Other products with changed specifications

Lift change (extension)

- The lift can be extended within the range in the following table, so specify as needed.
- Options other than those shown in the following table are also possible depending on the conditions, so contact HITACHI.

Chain Length and Chain Container

It is necessary to use a chain container of a capacity fitted to the length of chain to be contained.

	Rated Load(kg)	Chain System	Chain Length(m)	Lift (m) and Name of Container																					
				3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24
S Series	250	$\phi 6.3 \times 1$	LIFT+0.5			Ax							Bx						Cx						
	500	$\phi 6.3 \times 1$	LIFT+0.5			Ax							Bx						Cx						
	1,000	$\phi 7.1 \times 1$	LIFT+0.7			D					E							F							
	2,000	$\phi 7.1 \times 2$	LIFT+1.4	D		E				F				G											
	3,000	$\phi 7.1 \times 3$	LIFT+2.4		E	F				G															
F Series	5,000	$\phi 7.1 \times 3$	LIFT+3.9	F		G																			
	1,000	$\phi 7.1 \times 1$	LIFT+0.7		D					E								F							
	2,000	$\phi 10 \times 1$	LIFT+0.8		E		F							G											
	3,000	$\phi 10 \times 2$	LIFT+1.6		F			G					I												
	5,000	$\phi 10 \times 3$	LIFT+1.8		G					I															

Tropical treatment added

The motor is varnish treated twice when it will be subjected to high humidity conditions.

Insulation grade change

The standard product uses E grade insulation, but F grade insulation is possible (motor only).

On beam first stage

The ET trolley beam width is one grade higher than the standard.

With protective cover

This is a resin coated cloth main unit protective cover.

Upper hook direct connection type

This type directly connects the trolley and hoist body using an I-hook.

Optional chain container

Plastic is the standard specification, but it can also be made of steel plate.

With thermal protector

This product can come with a thermal protector to prevent motor burnout.

Technical materials

Power cable allowable length

The power cable allowable length for the standard specification is shown in the following table. When extending the power cable or relay cable, make a selection after referring to the following table.

Allowable Power Cord Length

When extending power cord, cord length should be less than the values in this Table.

(m)

	Rated Load (kg)	Cable Size															
		0.75mm ²		AWG #18		1.25mm ²		AWG #16		2.0mm ²		AWG #14		AWG #12		3.5mm ²	
		Hoist only	With Motor Trolley	Hoist only	With Motor Trolley	Hoist only	With Motor Trolley	Hoist only	With Motor Trolley	Hoist only	With Motor Trolley	Hoist only	With Motor Trolley	Hoist only	With Motor Trolley	Hoist only	With Motor Trolley
S	250	31	27	34	29	52	45	54	47	74	52	76	54	—	—	—	—
	500	27	20	29	21	46	33	48	34	74	52	76	54	—	—	—	—
	1,000–5,000	27	20	29	21	46	33	23	18	74	52	76	54	118	86	125	92
F	1,000	13	10	14	11	22	18	11	8	35	29	36	30	57	48	61	51
	2,000–5,000	—	—	—	—	—	—	—	—	17	13	17	13	28	21	30	23
	10,000–15,000	—	—	—	—	—	—	—	—	8	6	—	—	14	10	15	11

* The length is calculated using 40V for the drop amount where the voltage drop only occurs in the cable. (For a power source of 400V)

About the method with a stopper

Wheel stopper

After the trolley has been installed on the travel rail, always install a stopper on the end of the travel rail to prevent the trolley from dropping off.

- Avoid using the stopper to stop the trolley by letting it run into the stopper.
- Using a stopper that is a different color from the travel rail is an effective means for preventing the trolley from striking the stopper because it makes the stopper stand out.

Damper

The stopper should be used with rubber or other shock absorbing material to absorb the shock when the trolley strikes the stopper. The rubber damper shown in the figure at right is available, so please make use of it.

Installation of trolley stopper

Runway Beam Width (mm)	Materials (L Shaped Rolled Steel Bar)	H (mm)	Bolts and Nuts
75	50×50×6	30	M10
100		40	M16
125		50	
150	65×65×6	60	M20
175		65
